EXPERIENCE

SoundHound AI Inc. User Experience Designer

Sept 2019 – Nov 2022 Santa Clara, CA

Created wireframes and launched new features for the SoundHound Music app, which has a global audience of over a million monthly users.

Re-organized the design system for the Hound app to improve our team's internal workflow and create a consistent visual identity.

Utilized the Ant Design System on a cross-functional team to design a data dashboard for reviewing voice AI queries, which was successfully launched internally within a month.

Collaborated with a small team to create a series of videos showcasing SoundHound's voice AI technology, and provided feedback to external partners on how to improve their voice AI experience.

Leap Design Studio Product Designer

Sept 2018 – June 2019 Remote

Designed web and mobile UI mockups for Leap's clients in Sketch, and created animated prototypes using Adobe After Effects and Principle.

Worked remotely in Figma with other designers to wireframe user flows and design marketing materials such as emails and product shots.
