EXPERIENCE

SoundHound AI Inc. User Experience Designer

Sept 2019 – Nov 2022

Santa Clara, CA

- Created wireframes and launched new features for the SoundHound app, which has a global audience of over a million monthly users.
- Re-organized the design system for the Hound app to improve our team's internal workflow and create a consistent visual identity.
- Utilized the Ant Design System on a cross-functional team to craft a data dashboard for reviewing voice AI queries, which was successfully launched internally within a month.
- Collaborated on a small team to create a series of videos showcasing SoundHound's voice AI technology, and provided feedback to external partners on how to improve their voice AI experience.

Leap Design Studio

Product Designer

Sept 2018 – June 2019

Remote

- Designed web and mobile UI mockups for Leap's clients in Sketch, and created animated prototypes using Adobe After Effects and Principle.
- Worked remotely in Figma to wireframe user flows and design marketing materials such as email templates and product shots.
