EXPERIENCE

Anvil Foundry — Design Contractor
Feb 2026 – Present — *Remote*

- Led redesign efforts for pricing and developer documentation pages for an AI startup
- Designed clearer onboarding and navigation experiences for SDK-related workflows
- Collaborated with stakeholders on product messaging and web UX

Career Break
2023 – 2025

- Pursued personal growth through language studying in Asia, designing a coffee roastery brand, creating generative and print-based art with TouchDesigner, earning a data analytics certificate, and volunteering at a local library.

SoundHound AI — User Experience Designer
Sept 2019 – Nov 2022 — *Santa Clara, CA*

- Designed and shipped multiple high-visibility features for the SoundHound mobile app, contributing to improved engagement across a global user base of 1M+ monthly users.
- Overhauled the Hound app's design system, streamlining internal workflows and enabling more consistent production of UI across teams.
- Partnered with engineering and marketing teams to launch an analytics dashboard and animate proof-of-concept demos showcasing SoundHound's voice AI technology.

Leap Design Studio — Product Designer
Sept 2018 – July 2019 — *Remote*

- Designed responsive web and mobile UI concepts for clients using Sketch, and prototyped interactions through video concepts in After Effects and Principle.
- Created wireframes, and marketing assets (email templates, product visuals) in Figma, supporting distributed teams and accelerating client delivery timelines.

EDUCATION

Carnegie Mellon University
2014 – 2018

Bachelor of Design (BDes), Communication Design
Minor in Human-Computer Interaction
